

High Waters Trouble Provo

19 Sep 1984

By PAT CHRISTIAN
Herald Staff Writer

Floodwaters still cover an area where Provo City's parks and recreation department is building a new industrial park and golf course.

Floodwaters have already put construction six weeks behind, according to Provo parks and recreation director LeRoy Dennis.

Giant mechanical earthmovers are already rearranging the landscape for the new East Bay Golf Course.

Dennis says in spite of the delaying effects of the water, a target date of Fall, 1985 for the opening the first nine holes of the new 18-hole golf course remains on track and he doesn't think present or future flooding will block the project.

"If we keep up the good weather it will evaporate most of the water from the project," Dennis said.

Overall plans call for constructing a new golf course just south of the present one and converting the present golf course into an business and research park.

The industrial park is being constructed atop the present golf course because it was impractical to build on the landfill since crews would have dig out the landfill's garbage before erecting a building on that site.

Dennis says the present plan is the less expensive solution and will also provide a better golf course than exists now.

The project will be timed so when play at the present golf course ends, play at the new course will begin.

At that point, a business and research park will be constructed

at the older golf course.

Because of the water and also because the new golf course is being built on the old landfill, costs of construction will be slightly higher.

As heavy earth-moving equipment reworks the old landfill south of the present golf course, old tires and other garbage is readily visible.

Dennis says after top soil and grass covers the area, there will no problems from the garbage below.

But he said, "We might have problems for a while with the lakes or water hazards where we will have to skim debris off the surface that floats up from the landfill."

Even as construction crews work, garbage completely covers several of the lakes that have been formed so far. Dennis says it could a couple of years before the lakes silt enough so garbage doesn't float to the surface and has to be skimmed off.

Dennis expects floodwaters that covered much of the construction site in spring and still lingers to hamper construction crews, but he said flooding shouldn't stop the project from being completed.

"We are using fill from the lakes or water hazards to raise the fairway areas of the new golf course," said Dennis. "The course will be covered by three feet of fill or about 600,000 yards of dirt."

This raising of the landscape should allow golfers to play the new course even if the floodwaters reach previous levels.

The flood-stage level of nearby Utah Lake was 4,494 feet above mean sea level. The lowest fairways at the new golf course will be 4495 feet.

Other activities throughout the day include a children's arcade, flower show, arts and crafts displays, a softball game, a pet show, a horse show, a waterme-

The theme has been selected 'Our Kind of Town' which we feel depicts the true spirit in Lindon. Everyone is invited to Lindon's City Fair."

Parents' Night Set at Sunset

Sunset View Elementary School in Provo will conduct its annual back-to-school night Thursday.

Activities begin at 7 p.m. with the Flower and Vegetable Show.

At 7:30 p.m. the PTA will conduct a short information meeting. Following that parents will have an opportunity to meet with their children's teachers briefly.

n St. John's, Ariz. He also attended Brigham Young University. He served as deputy sheriff in Apache County, Ariz. He was also a cattle inspector and a saddle bronc rider.

He was active in the LDS Church, being a High Priest and serving in various callings. He served three missions to the southern states for the LDS Church. He owned and operated Lund Motel in Provo for more than 20 years.

He is survived by his wife, of Mesa, Ariz; two sons and two daughters: William Guv

Death Notices

Dorothy Amy Westerman Henline, 69, of Spanish Fork, died Wednesday, Sept. 19, 1984, at her home. Services are pending and will be announced by Walker Mortuary of Spanish Fork.

Margaret Fautin, 84, of Lindon, died Tuesday, Sept. 18, 1984, in American Fork. Services are pending and will be
